■ *June 30 is the hard deadline. Heavy day — stay ahead in weeks 3-4 to protect this day.*

RULES TO PROTECT THIS PLAN
1. Never skip 2 days in a row — 1 lazy day is fine, 2 kills the plan
2. EDA projects and SQL assignments get full time — don't rush them
3. Week 5 is the most packed — stay ahead in weeks 3-4 so you have buffer
4. Morning: 2 hrs video + code along | Evening: 2 hrs assignments + GitHub push
5. LeetCode SQL: 2 problems/day starting June 19 (SQL Functions week)
